Buzzed Technologies

Automating Businesses in the AI era.

- Enterprise-ready Software
- Internal Tooling
- Client-facing Experiences

… customized exactly to your needs

THE PROBLEM

For 20 years, businesses bent to fit their software.

SaaS was quick and "good enough" — but that convenience came at a real cost.

- Paying for features you never use
- Rigid workflows that force you to adapt
- Generic tools built for the average business

THE SHIFT

AI changed how software gets built.

What used to require a full dev team and 6–18 months can now be built in weeks at a fraction of the cost. Leveraging custom solutions are now faster and cheaper than forcing your team into a generic box.

Full dev team → **Lean, expert team**

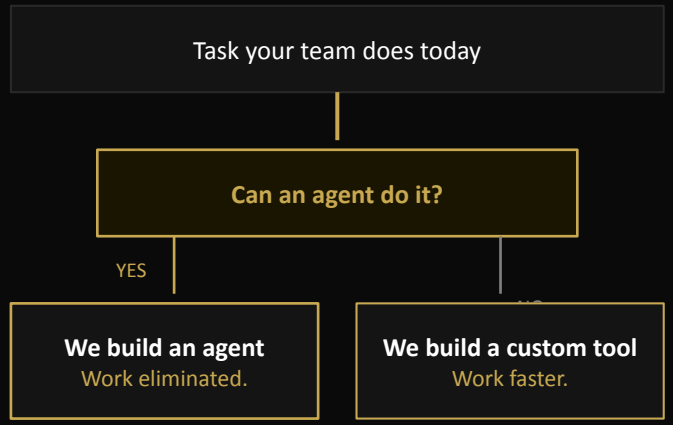
6–18 months → **Weeks**

$250K+ investment → **Fraction of the cost**

OUR APPROACH

Every task gets one question: *does this need a human?*

AI agents are our first tool. If a task can be handled by an agent, we build one. If it needs a human, we build a custom tool that makes them faster. Either way, your team stops doing work that doesn't require them.



Flagship Product: AVA

Agent trained on your business.
Manges phone line, texts, emails.

Handle inquiries, vetting, and follow-ups 24/7.
Your team steps in only when needed.

Backoffice Automation

Database updates, auditing, forms, invoicing.
Anything repetitive, we'll program it.

Set recurring tasks and triggers that do the work for you.

Custom SAAS Replacement

Tailored tools built around your workflows. No rip-and-replace. Designed to scale.

Stop overpaying on platform subscriptions that you only use one feature from.

WHAT WE'VE DONE

50+	$4M+	$1M+	2M+
Projects	Revenue Added	Costs Saved	End-users Reached

100% Automated

Angelone Homes — Luxury Home Builder, Central NJ

> AI concierge handles all client inquiries, lead vetting, servicing. Customers didn't notice the switch.

99% Cost Reduction

AppAdvisor — College Application Support Software

> Agents keep university data up-to-date automatically. Eliminated nearly all manual data-sourcing costs.

CAPABILITIES

- **Finetuning & Datasets**
- **Custom Agent Workflows**
- **Tool & Dashboard Integration**
- **Security-First Architecture**
- **Live Data Context**
- **Scalable Infrastructure**
